Subject  
Programmatic Environmental Impact  
spraying

Brian Amme, Project Manager:

1 My husband, Irv and myself, Marie Neil are seniors and just became aware of the BLM's idea of spraying our public lands with poison's!

We vehemently oppose this action for our health and the health of wildlife.  
2 Our world is over-dosed on poison's in our atmosphere already and we don't need our only wilderness areas contaminated also!

Please stop this insanity!

3 We are in support of Option C of the Bureau of Land Management Programmatic Environmental Impact Statement. We understand this Option uses more herbal light impact on our lands.

Please consider our opinion in your decision.

Sincerely,

Irvin and Marie Neil
